An undergraduate, 2<sup>nd</sup> year, **Computer Science** student at **IIT**, focused on Full Stack Development. Enthusiastic about building reliable, scalable, and high-performing web applications through efficient front-end and back-end development. Passionate about designing intuitive user interfaces, developing robust server-side logic, and ensuring seamless integration between systems.

Dedicated to delivering smooth digital experiences by maintaining high standards of code quality, performance, and functionality. Driven by curiosity and a commitment to growth, with a strong interest in modern frameworks, database management, API development, and emerging trends in full stack technologies.

**Open to opportunities across various roles in the software development field and adaptable to contributing wherever needed to add value and grow professionally.**

## EDUCATION

### INFORMATICS INSTITUTE OF TECHNOLOGY

- Foundation - Merit
- Level 4 / Year 1 - Credits 120/120
- Level 5 / Year 2 2023-Present

### National Institute of Business Management

- Certificate of Computer Science 2023

### Esoft Metro Campus

- Certificate in English 2022

### Kalutara Balika Vidyalaya

- G.C.E O/L | A-8 B-1 2022

## PROJECTS

### • HS Code searching System (First time in SL)

Developed an AI-powered HS code classification platform that enables users to quickly identify accurate 6-digit customs codes for products. The system integrates intelligent search and real-time product recognition to improve classification accuracy and reduce manual effort. Designed and implemented a responsive, user-friendly interface with a focus on performance and seamless user experience. Contributed to building one of the first Sri Lankan platforms in this domain, emphasizing innovation and practical problem-solving in international trade processes.

Methodology - Angular

### • Life on Land

A university group project built a website using HTML, CSS and JavaScript for Sustainable Development Goal 15: Life on Land.

- **Traffic Data Analysing System**

A university individual project built a traffic data analysis system using Python and Tkinter.

- **Percolation Processing System**

Individual project, Created a Python program which will allow users to demonstrate a Percolation Process using Python, HTML and Notepad.

- **Information System**

Individual project, developed an information system to maintain the details of the projects a construction company undertake.

- **Portfolio**

Individual project, created a personal portfolio website (thamadi.me) to showcase my projects, skills, and experience with a clean and responsive design.

## SKILLS

### TECHNICAL SKILLS

- Programming Languages: Python, Java, HTML, CSS, JavaScript, PHP
- Frameworks & Technologies: Node.js, Next.js, React.js, Flutter
- Database Management: MySQL, MongoDB
- Tools: Visual Studio Code, IntelliJ Idea Ultimate, Canva, Apache NetBeans, Cursor AI, Windsurf, Android Studio
- Version Control: GitHub

### SOFT SKILLS

- Strong communication and leadership (English & Sinhala)
- Team collaboration and project management
- Problem-solving and critical thinking
- Adaptability and quick learning
- Attention to detail and innovation mindset
- Ability to work under pressure

### CERTIFICATIONS

- [Certificate in Computer Science \(2023\)](#)
- [Foundation in Computer Science \(2024\)](#)
- [Java 17 - LinkedIn Learning](#)
- [IIT PDU - Java Programming](#)
- [Microsoft Azure](#)

### EXTRACURRICULAR ACTIVITIES

- A prefect of Buddhist School
- Swimming, Badminton, Carrom
- Commerce Socceity, Science Club
